

Dear colleagues,

The work has been planned after the Barcelona plenary and supported events are on their way for this summer. Please all join the ICC conference this June, but do not forget to register for the e-photon/ONE+ workshop: **Findings and Experiences from European Research Projects on Optical Networking**

Hope you enjoy this Newsletter issue  
The editorial team

### ➤ First Plenary Meeting- Report now on line

**Barcelona, 27-28 February 2007**

**Meeting location:** UPC Campus Nord

The First Plenary of e-photon/ONE+ took place in February. Together with the meeting many WP meetings associated were held on Monday 26, and the meeting took place among vivid discussions on many technical issues related to the NoE and planning on the next phase of the NoE. You can now find the draft minutes online. Please all have a look and modify/discuss accordingly.

### ➤ End of the 1<sup>st</sup> year and 2<sup>nd</sup> reporting period

**1st of March 2007**

The end of the first year of the project is here and all partners are busy with finishing deliverables, reporting on their work and WP leaders getting ready for the review meeting in May.

On behalf of the Management Team all the partners are kindly appreciated for the input and work!

### ➤ Supported events

**Workshop on "Findings and Experiences from European Research Projects on Optical Networking" in conjunction with ICC2007, Glasgow, UK.- please REGISTER NOW!**

The workshop is organized by e-photon/ONE+ partners and brings together representatives of many FP6 IST projects, officers and researchers of major European research consortia. This workshop will be a unique opportunity to have an up-to-date overview on numerous European research programs, surveying the experiences of the main European actors in optical networking, also in comparison with research activities in Asia and America. In addition, this workshop will offer an excellent chance to researchers from the entire world for meeting up and sharing new ideas, possibly paving the way to new joint efforts in the area of optical systems and networks.

**We would appreciate your attendance at the workshop. However to make the workshop happen we need a number of people to register so if you are planning to attend please do not neglect to REGISTER WITH THE WORKSHOP.**

### ➤ Announcements

This is a reminder that an official notification has been received that the responsibility of e-photon/ONE+ has been transferred to the new Project Officer, who is Mr. Pierre Chastanet, replacing Mr. Jorge Carvalho. He is formally in charge of our NoE since March the 15th.

## Supported Events (cont.)

### Workshop on Future Optical Networks- REPORT ON LINE

**OFC 2007 Anaheim; Sunday, March 25, 3:30 p.m. – 7:30 p.m., Ballroom C**

The workshop was organized and sponsored by e-Photon/ONe+ ([www.ist-ephoton-one.org](http://www.ist-ephoton-one.org)) OP/BS Forum (<http://www.obsforum.com/>) and Photonic Internet Forum (<http://www.scat.or.jp/photonic/english/index.html>)

The workshop was well attended with more than 200 attendees and excellent presentations from Europe, Japan and USA. You can find the minutes on line now. For more information and slides of the presentations: <http://www.cse.buffalo.edu/~xliu8/workshop07/index.html>

### The 11th International Conference on Optical Networking Design and Modeling, Athens, Greece on May 29-31, 2007-FINAL PROGRAMME

ONDM conference is a major event in the rapidly growing area of optical networking. The conference received a significant number of paper contributions from many research groups around the world, presenting their recent advances in the design, modeling and implementation of optical networks, including novel switching schemes and paradigms, network optimization and design, new concepts for link and control layer protocols, advanced network subsystems and node architectures, and network inter-working schemes. Also many of the contributions are from active e-Photon/ONe+ partners presenting their joint work and activities.

Finally, a number of excellent invited speakers from leading international academic and industrial institutions participate and will present their research work and view. The ONDM 2007 conference program is available at the following link <http://www.ondm2007.gr/pdf/Program.pdf>

Note the conference will host a special session on metro network supported by VD-M as well as a number of e2+ WP meetings run in parallel. For more information please visit [www.ondm2007.gr](http://www.ondm2007.gr)

## e-photon/ONe+ events

### 2007 e-photon/ONe+ Summer School: "Advanced optical communications systems: from short range to long haul networks" Conference on Trends in Optoelectronics GET/ENST Bretagne in Brest, Brittany, 16-20th July

The first call for papers for the 2007 Summer School to be held at the GET/ENST Bretagne in Brest, Brittany from the 16-20th July on the subject of "Advanced optical communications systems: from short range to long haul networks", is out. Full details can be found at the Summer School website : <http://conferences.enst-bretagne.fr/ephotonone/>.

## Advertised events

### MUSE Summer School, Budapest, July 5, 2007

The one-day MUSE Summer School is organised by BUTE and will be co-located with the IST Mobile Summit in Budapest on July 1-5, 2007. Tutorials will focus on fixed mobile convergence support in a broadband access network and tackle aspects like network architecture, security, policy and mobility management. More information about registration and detailed agenda will soon be available on <http://www.mobilesummit2007.org>

## NoE partners by Region

### Germany

Fraunhofer - Fraunhofer Gesellschaft zur Förderung der angewandten Forschung e.V. <http://www.fraunhofer.de>

TUB - Technische Universität Berlin: <http://www.tu-berlin.de/>

UDE - Universität Duisburg-Essen: <http://www.uni-duisburg-essen.de>

UST-IKR - Universitaet Stuttgart: <http://www.ikr.uni-stuttgart.de>
